

## **EE422C Project 3 (Word Ladder) Team Plan**

Akaash Chikarmane (avc536)

Nicholas Sutanto (nds729)

Spring 2017

Initially, Akaash wrote the DFS module and Nicholas wrote the BFS module. Then, both of us sat down for debugging and both of us helped with debugging each other's function. Three test cases were written by Nicholas and two test cases were written by Akaash. We spent approximately 11 hours in the same room. We also used a GitHub repository to share helper functions and debug each other's code. The final testing was done together.
